

# Golden Plains Walk-In Clinic

**Convenient, Affordable Care. No Appointment Needed.**

Minor Care is the place to turn when you need healthcare during your busy day, at night, on the weekend, or when your primary care provider's office is closed. Minor Care provides quality, cost-effective treatment for minor injuries and illness on a walk-in basis, seven days a week—no appointments needed.

The providers and medical staff at Golden Plains Walk-In Clinic are there to address any illness or injury that requires prompt attention but is not life or limb threatening. All existing Golden Plains Community Hospital patients, as well as new patients, can seek medical attention at Golden Plains Walk-In Clinic.

## What is Considered an Emergency?

When you need immediate treatment for life-threatening injury and illness seek emergency medical care. Minor care is not a substitute for emergency treatment. Some examples of conditions that require emergency medical care include:

- Chest pain, difficulty breathing, or shortness of breath
- Numbness in the face, arms, or legs
- Heavy, uncontrollable bleeding
- Moderate to severe cuts and burns
- Severe broken bones
- High fevers
- Poisoning
- Convulsions, seizures or loss of consciousness
- Pregnancy-related problems
- Fever in newborn (less than 3 months old)
- Serious head, neck, or back injury

**Dial 911 immediately for any medical problem that is considered life-threatening.** If you are unable to call 911, ask someone to call for you or take you to the nearest emergency care facility.

## When to Visit Minor Care (serving patients 7 months and older)

When you need treatment right away for non-life-threatening injury and illness, visit Golden Plains Walk-In Clinic. Some examples of conditions appropriate for minor care include:

- When you cannot get in to see your primary care provider
- Nausea, diarrhea, and vomiting
- Colds, flu, fever, sore throat, cough, and congestion
- Allergies and rashes
- Migraines and earaches
- Minor broken bones
- Minor cuts and burns
- Sprains or strains
- Infections
